DETAILED ACTION

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "plurality of lifting/lowering devices" (claim 10) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claims 2-6, 9 and 10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As to claim 2, "the means for altering the contact force" lacks antecedent basis. What does "/" (line 2) mean? Is it --and/or--?

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Enright.

Enright teaches a device including: movable test surface 16 to simulate rolling conditions of a wheel 26 which contacts said test surface with a contact force; and assembly (24, 20) that provides for "cyclic rotational movement of the pitch beam 20"

Art Unit: 2856

(col. 5, lines 10-11) at a "desired frequency" (col. 4, line 39) that (inherently) changes the contact force.

As to claims 1-3, no weight was given to Applicant's preamble, as the body of the claim by itself does define the meets and bounds of a device (as in "device comprising:" (of line 3 of Applicant's claim 3).

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Bennett lifts a vehicle with platform 16, but is not related to slip.

Claims 7 and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Regarding claim 7, note that the body of claim 7 refers back to the preamble of claim 1, and thus the preamble was given weight.

As to claim 11, note was made of the combination of "a *vehicle* test bench" (italics added) with remaining claim limitations. Enright's tester does not hold a vehicle.
